A Day in the Life (of a Quantum Mechanic)

Part A
Verse 1
The arc of the spark, and the heat will unfold
It could touch off a conflagration.
The dark it is stark it is uncontrolled
A dangerous amalgamation

If misapplied,
Worlds will divide
Can't be denied
Side to side

By and by, the electrons will fly
So, what about the radiation?

Verse 2
Lose the fuse, everybody gets the blues
Let's call it an extinction moment
Time will skew everything will be brand new
But nothing left for us in the moment.

If misapplied,
Worlds will divide
Can't be denied
Side to side

The cold it is old it is uncontrolled
But what about the radiation?

Part B
Count the protons slice the photons
Add the muons
This is what we're paid to do.

Are your up quarks looking down? <—Cara
Give us a call <—Eli
NO JOB TOO SMALL! <—Everybody

A neutrino without a mass? <—Cara
Give us a call <—Eli
NO JOB TOO SMALL! <—Everybody

Your photon doesn't travel fast?<—Cara
Give us a call <—Eli
NO JOB TOO SMALL! <—Everybody
