Better Place (Eli Hoehn)

Tell me where to go, let me know
Where it's so, where I can find a better place
On a brighter day, let's play
Take us all away…to a better place
High upon a hill sneak a thrill
Find a spot to chill, in a better place
Have a little taste to embrace
Just in case, there's a better place
Better place better place…oh yeah.

I talked to my analyst she told me what I needed to know
She said I was the catalyst and that I should let it all go
She said, "this place is malevolent and if you stay it will grow
Oh oh"
Now I feel so irrelevant, I need a better place to go
Oh oh…oh oh…oh"

Then I went to my chiropractor she's my friend, her name is Max
She put me on the table and gave my back a couple of cracks
She said, "I'm so confused by alternative facts.
Oh oh
I need to know what's real but I'm fading fast,
Oh oh…oh oh…oh"

So I found a philosopher, a homeless guy, they call him Dave
He talked about philosophy and told me all about the cave
He said we're chasing shadows and it's really hard for us to behave
Oh oh
Now he's lying in a gutter and there's not much left to save
Poor Dave…behave…the cave.
